

WHY SHOULD A LUNG CANCER SCREENING PROGRAM PARTICIPATE IN QUILS™-SUMMIT?

01 QUALITY

- Supports meeting quality metrics & Commission on Cancer (CoC) accreditation standards.
- Provides objective data to inform reporting on QI projects.
- Delivers personalized audit & feedback , including strategies for improvement.

02 SUPPORT

- Obtain funding support, including up to \$16,000, for lung cancer screening implementation efforts.
- Receive assistance with membership & data submission to the largest nationally recognized lung cancer screening registry.

03 OUTCOMES

- Assess strengths & opportunities across 21 quality elements in 7 key domains.
- Access strategies to increase screening uptake & program effectiveness.
- Receive practice facilitation & individualized problem-solving support.

04 RESOURCES

- Gain access to evidence-based implementation strategies for lung cancer screening.
- Utilize an online resource portal with tools, training, and educational materials.
- Receive guidance from national lung cancer screening experts.

05 PROGRESS

- Network with lung cancer screening professionals from across the country.
- Contribute to research that advances high-quality lung cancer screening nationally.
- Receive an implementation, tailoring, and sustainment guidebook informed by study findings.

QUILS™ – SUMMIT is a national randomized trial designed to help lung cancer screening programs (LCSPs) optimize their delivery and outcomes.

Funded by the National Cancer Institute (NCI) [UG3CA305778], the study examines implementation of the full QUILS™ system in LCSPs across the country.
